Fairbanks Nijhuis™ pumps are supplied with several different types of commercial couplings. The following instructions apply to units supplied with a Woods coupling. If your unit has a different make coupling, a loose leaf instruction sheet will be attached to this manual and should be thoroughly studied before proceeding.

3. BEARING LUBRICATION (continued)

Check the oiler setting periodically to insure the setting is correct. Refer to the following table for

The stuffing boxes on Fairbanks Nijhuis™ pumps are packed at the factory. All packing is subject to wear and should be given regular inspections and, if necessary, periodic adjustments. Generally, packed box pumps require inspection of the packing and adjustment of the gland after each 150 hours of operation.

7 PUMP ASSEMBLY (continued)

The table content is almost entirely obscured by black redaction bars. Only a few thin white horizontal lines are visible, suggesting the presence of a table with multiple rows. The redaction covers the majority of the page's content area.

ORDERING PARTS

There are a variety of options available for this pump. When ordering parts, give pump serial number, size and
